Subject: Re: QLs for Dimock Data

Dawn -

Thanks! This is very helpful. I will talk with Rich tomorrow and we'll get back to you.

I do have one comment now - I see that you have noted the QL for Chromium as being 10 ug/L. However - I believe that the lab was typically achieving 2ug/L.

Also - I spoke with Cindy Caporale and our SERAS contractor who is managing our database. We realized that the MDL for the organics is not always being recorded in the EDD from the lab. And for some unknown it is often listed as "0". However, this is not correct. We are working to get MDLs in the database. Until we can, Cindy is following -up to get you a list of the actual MDL for each analyte. Hopefully this will help in the review of the upcoming data.

On that notewe are still working to get the week #2 data (20 homes) finalized. I am hopeful that we will be sending you the tox memo's late tomorrow.

Thanks Again! Hang in there - Kelley

Subject: QLs for Dimock Data

Hi, Kelley. The attachment should address questions regarding QLs and RSLs for the Dimock data. Let me know what you think, and what the final format should be (memo or e-mail). Thanks.

Dawn
